- The Supply Chain Blueprint
 - Goal
 - Mission
- The participating companies
- The collaboration thematic structure
- The resulting activities
- Next steps

Supply Chain

- A **system** of **organizations**, **people**, **activities**, **information**, and **resources** involved in **moving a product from supplier to customer**.
- **Activities** involve the **transformation** of natural resources, **raw materials**, and **components** into a **finished product** that is **delivered to the end customer**.

Blueprint

- A blueprint is a **engineered design**
- **Continuous improvement**

To provide measurable value to OEM Supply Chain leaders and their providers by bringing them together to:

Mission:

To create intentional industry changing thought leadership opportunities for OEM Supply Chain leaders and their providers.
