“OPPORTUNITIES & CHALLENGES”

THE WOODLANDS, TEXAS
DECEMBER, 9, 2016

In Mexico, **3 million** people do not have access to electricity and even a larger number won't have access to basic infrastructure and constant power supply.

By 2040...

A **30%** of the increase in energy demand is expected, mostly from developing countries.

And yet **500 million** people are still left without access to electricity.
